#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17, 23 and 24 have been rejected under 35 U.S.C. 102(b) as being clearly anticipated by Aitken, 4972684.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-22 and 28-30 have been rejected under 35 U.S.C. 103(a) as being unpatentable over Aitken, 4972684. Aitken discloses a half oval cross sectional contour. It would have been an obvious design choice to change the shape of Aitken's cross sectional contour into an essentially oval cross sectional contour to yield the predictable result of changing the look of the bangle. Claims 19-22 are also directed to the shape of the bangle and would be obvious for the same reason as stated above, i.e., design choice to produce a yieldable, predictable ornamental look.

Regarding claim 28, Aitken fails to disclose the specific dimension at which the spray head protrudes between 15-30 mm into the tube end of the tube for accommodating the spray head. Since the specification fails to disclose any critical to this claimed specific dimensions and is for no particular purpose. It would have been obvious to make the bangle to any size suitable for the weather to produce a useable ornamental bangle.

Claims 25 and 27 have been rejected under 35 U.S.C. 103(a) as being unpatentable over Aitken, 4972684 in view of Aitken, 5217143. Aitken, '684 fails to disclose a stop for actuating the spray head. Aitken, '143 discloses a stop for actuating the spray head. It would have been obvious to add the stop to Aitken, '684 in order to

actuate the spray head while the head is within the bangle in order to use the dispenser without the need to remove the dispenser from the bangle to save time and effort in dispensing fluid from the bangle.

***Allowable Subject Matter***

Claim 26 has been objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
